

THE MINSKY™ ATLASIQ PLATFORM

Minsky™ AtlasIQ is Ai Labs, Inc.'s sovereign-grade simulation and decision-intelligence platform, built on the Minsky™ AiFactory engine — enabling governments, DFIs, corporates, and mission-aligned organizations to model, simulate, research, and implement decisions in real time, with document-grounded outputs and zero hallucinated figures. This brochure covers three core modules: Strategy Studio, Research Studio, and Analysis Studio. **Plans Available:** Individual, Enterprise, On Prem, Sovereign Cloud.

STRATEGY STUDIO

AI-Generated, Multi-Strategy Scenario Modeling

For any business or policy question

- AI generates the input parameters for any business or policy scenario
- Models up to five alternative strategies with country-specific context
- Delivers detailed or executive-summary reports across 15+ analytical modules

» **Typical output: 100+ page quantitative GTM / policy report with financial, risk & compliance modeling**

RESEARCH STUDIO

Document-Grounded Deep-Dive Analysis

Upload, analyse, and benchmark against your own material

- Upload up to 10 documents (PDF, Excel, Word) for direct AI analysis
- Each request auto-routed to the best-suited Minsky™ engine
- Covers benchmarking, cost/TCO, compliance mapping & geopolitical risk

» **Grounded in your own source material — not general web recall or unverified chat output**

ANALYSIS STUDIO

AI-Powered Financial Analysis, Reporting & Proposal Generation

Upload financial documents and get decision-ready outputs in minutes

- Upload annual reports, financial statements, budgets, audit records, project documents, or business plans
- Generates financial audit reports, business/project proposals, and executive summaries — or ask Minsky™ directly via natural language
- Every output is grounded in your documents, structured, and presentation-ready

» **Replaces hours of manual financial analysis with AI-powered insights ready for stakeholders, investors & clients**

15+

Analytical modules per
Strategy Studio report

10+

Source documents analyzed per
Research / Analysis Studio query

5

Alternative strategies modeled
simultaneously

100+

Page boardroom-ready
branded deliverable

PLATFORM CAPABILITIES

Dashboard & AI Comparison

Cross-strategy synthesis and Q&A

- Compare up to three saved strategies side-by-side
- Ask free-form questions across saved strategies and reports
- Every result exports as a boardroom-ready, branded PDF or Word report
- Ask Minsky™: a built-in natural-language assistant for querying your saved strategies, research, and documents directly, no manual searching required

» **Replaces manual partner/analyst synthesis and deck-building cycles**

Enterprise SaaS Platform

Governed, multi-tenant deployment

- Dedicated multi-tenant workspaces with per-user data isolation
- Admin-managed teams and seats, credit-based subscriptions, built-in billing
- Cloud, on-premises, or fully sovereign / air-gapped deployment

» **On-Prem / Sovereign AI: routes to self-hosted models with zero code leaving your infrastructure**

WHO IT SERVES

Stakeholder	Value Delivered
Governments & Investors	Policy modeling, fiscal reform, investment risk modeling & sovereign debt simulation — e.g., national budget scenarios, infrastructure investment appraisal, sovereign wealth allocation
DFIs, MDBs, Donors	ESG simulation, grant optimization, investment diligence — e.g., development-impact scoring, portfolio-level ESG audits, donor fund allocation
Large Corporates & Banks	Risk modeling, GTM strategy, ESG / CSRD alignment — e.g., market-entry strategy, credit risk modeling, regulatory compliance reporting
SMEs, Startups & Individuals	Financial modeling, investor proposals, business planning — e.g., fundraising decks, three-year financial projections, market-sizing studies
NGOs & Communities	Impact audits, grant writing, multilingual development planning — e.g., donor reporting, community program design, cross-border needs assessments

TYPICAL ENGAGEMENTS

Minsky™ AtlasIQ is used across government, financial, and enterprise settings for engagements such as national-level investment and infrastructure planning, AI readiness assessments for universities and public institutions, go-to-market strategies for innovation hubs and centers of excellence, and investment risk modeling for large-scale capital projects. Each engagement is grounded in the client's own documents and tailored to their specific regulatory and strategic context.

HOW MINSKY™ ATLASIQ COMPARES

Traditional consulting firms and general-purpose LLM chat tools each solve part of the problem — deep domain expertise, or fast, low-cost iteration. Neither delivers governed, quantitative, document-grounded strategy at SaaS speed and economics.

Capability	Minsky™ AtlasIQ	Traditional Consulting	General LLM Chat
Typical turnaround	Minutes to hours	6–16+ weeks per engagement	Minutes — but ungrounded
Typical engagement cost	Credit-based SaaS subscription	\$250K–\$2M+ per engagement	Low-cost chat subscription; no deliverable
Document-grounded research	Native — up to 10 source documents per query	Manual analyst review of source material	No persistent document grounding
Audit trail & traceability	Full — every output is logic-based and sourced	Partial — engagement notes and workpapers	None — outputs are not reproducible
On-prem / sovereign / air-gapped	Native deployment option	N/A — people-based delivery model	Cloud-only
Boardroom-ready branded export	Automatic PDF / Word report	Manual deck-building by consulting team	Manual copy-paste, unformatted

ONE PLATFORM, THREE STUDIOS

Strategy Studio, Research Studio, and Analysis Studio are core modules of Minsky™ AtlasIQ — Ai Labs, Inc.'s AI-native strategy and research decision-intelligence platform, alongside Dashboard & AI Comparison and the Enterprise SaaS Platform. Available across Individual, Enterprise, On Prem, and Sovereign Cloud plans, all three studios share the same document-grounded, auditable approach — from multi-strategy scenario modeling and deep-dive research to financial analysis, reporting, and proposal generation.

Ready to Replace Fragmented Consulting Spend with One Governed Decision-Intelligence Platform?
