

ATLASIQ

REDEFINING GLOBAL DECISION INTELLIGENCE

The Cognitive Operating System for Global Decision Intelligence

AtlasIQ is a sovereign-grade simulation and advisory platform designed to replace traditional consulting, audit, and policy advisory functions through a multilingual, logic-based AI engine. It enables governments, DFIs, corporates, and mission-aligned organizations to model, simulate, and implement decisions in real time, with ethical overlays and zero human error.

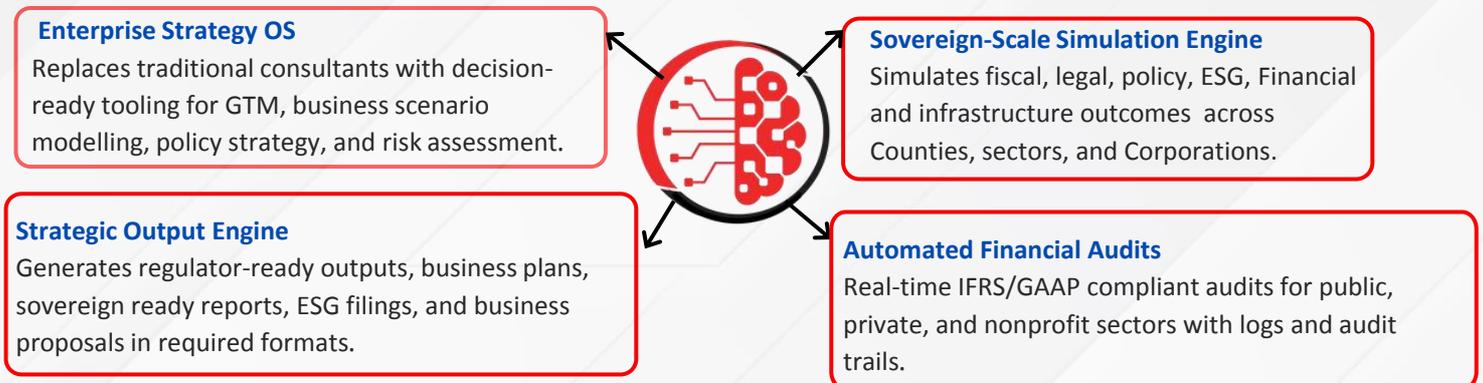

Built to democratize access to elite advisory capabilities — previously limited to major consultancies and billion-dollar entities — AtlasIQ delivers decision intelligence that is:

-  SEAMLESS
-  DATA DRIVEN DECISIONS
-  REGULATOR-READY
-  ETHICALLY GOVERNED

From national budgets to ESG audits, from basic ideas to complete Go To Market (GTM) entry strategies, AtlasIQ powers critical decisions across every layer of modern governance and enterprise.

CORE CAPABILITIES

Strategic Use Cases Deployed Successfully

- **USA** : Created Go To Market Strategy for AI Labs Training and skill development
- **USA**: Created GTM Strategy and funding proposal for establishing AI incubators
- **Maldives**: Developed a detailed AI Readiness proposal for Universities, Govt. Agencies & Corporations
- **Qatar**: Construction investment simulation for national-level planning
- **India**: Go-to-market strategy for establishing AI Centers of Excellence
- **Saudi Arabia**: Strategic investment planning for AI Data Center
- **Mongolia**: 3-year national budget modeling & power sector simulations
- **UAE**: Investment risk model for development of AI Data Centers

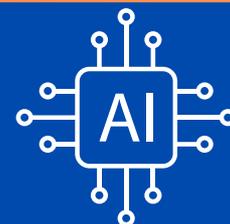

ATLASIQ

REDEFINING GLOBAL DECISION INTELLIGENCE

WHO IT SERVES

Stakeholder	Value Delivered
Governments & Investors	Policy modeling, fiscal reform, Investment Risk Modelling & sovereign debt simulation
DFIs, MDBs, Donors	ESG simulation, grant optimization, investment diligence
Large Corporates & Banks	Risk modeling, GTM strategy, ESG/CSRD alignment
SMEs & Startups	Financial modeling, investor proposals, business planning
NGOs & Communities	Impact audits, grant writing, multilingual development planning

AI Labs Inc.

Accelerating Intelligent Transformation for Governments, Institutions, and Enterprises

AI Labs Inc. is a global AI innovation company delivering strategic solutions at the intersection of artificial intelligence, governance, and economic development. With a focus on ethical design, precision outcomes, and scalable systems, AI Labs Inc. helps transform national agendas, enterprise capabilities, and public institutions through the responsible adoption of next-generation technologies.

Our work spans:

- Development of Innovative/Proprietary AI Platforms
- AI-Augmented Software Development for mission-critical digital transformation
- Enterprise and Public Sector AI Training with global certification frameworks
- Ethical AI Integration for ESG, Sovereign decks and Indigenous logic models
- Simulation and Foresight Engines for high-stakes planning, governance, and investment

Trusted by Govt. Agencies, DFIs, global banks, and Fortune 500 companies, AI Labs Inc. brings together cutting-edge research, localized deployment, and elite talent to power a more intelligent, equitable world.
