Minsky™ TaskManager

The sovereign, AI-native Task Management Platform

22	13	6	EN | AR
Integrated Modules	Built-in AI Agents	Deployment Models	Arabic-First RTL & Hijri

The Challenge

- **Forced migration:** Jira Data Center stopped new sales in March 2026 and ends in March 2029.
- **Cloud-only AI:** Atlassian AI requires its cloud — work data and AI leave your control.
- **Licence sprawl:** separate JSM, asset tiers and paid add-ons for Gantt and timesheets.
- **Regional gaps:** vendor-defined data regions, no native Hijri or Arabic-first experience.

The Answer: Minsky™ TaskManager

- **One AI-native platform** for agile delivery, work management, portfolio and ITSM.
- **Sovereign by design:** SaaS, sovereign cloud, on-premises or fully air-gapped.
- **Governed AI:** 13 agents on Minsky™ AiFactory; every AI change logged and reversible.
- **Easy switch:** Jira-compatible API, JQL-to-MQL and two-way sync; Arabic-first with Hijri SLAs.

Our Minsky™ TaskManager Platform

Domains: AI · Work · Plan · Service · Platform *One codebase · one data model · one licence*

AI Layer & Agents
Copilot, 13 agents, HITL and AI ledger

Work Items
Custom types, fields and 7-level hierarchy

Workflow Engine
Visual designer, validators and approvals

Agile & Sprints
Scrum, Kanban, backlog, WIP and releases

Views & Timeline
Board, list, Gantt and Hijri calendar

Collaboration
Live co-editing, comments and @agents

Plans & Goals
Roadmaps, scenarios, capacity and OKRs

Forms & Approvals
No-code bilingual intake and sign-offs

Reports & Dashboards
Burndown, velocity, SLA and DORA metrics

Service Desk
EN/AR portal, email, Teams, WhatsApp

SLA Engine
Business calendars and breach escalation

Incident & Change
ITIL 4 incident, problem, change, CAB

Assets / CMDB
CIs, discovery and impact analysis

Knowledge Base
Bilingual articles with AI drafting

Identity & Access
SSO, SCIM, MFA and tenant isolation

Search & MQL
JQL-compatible and plain-language search

Automation
Describe rules in plain words; dry-run

DevOps Toolchain
Git, CI/CD, builds and security findings

Integrations & APIs
REST, GraphQL, Jira API, extension SDK

Jira Migration
Assess, import and two-way sync

Admin & Audit
Schemes, hash-chained audit, SIEM export

Arabic & Mobile
RTL, Hijri dates, iOS and Android apps

How Minsky™ TaskManager Compares

Side-by-side with Jira and the most widely used work-management, DevOps and ITSM platforms.

Capability	Minsky™ TaskManager	Jira + JSM	Asana	monday.com	ServiceNow	Azure DevOps
Scrum & Kanban delivery	●	●	◐	◐	◐	●
Gantt, portfolio & OKRs	●	◐	●	●	◐	◐
ITSM in the same licence	●	◐	○	◐	●	○
Assets / CMDB & impact	●	◐	○	○	●	○
Built-in AI agents	●	●	●	●	●	◐
AI on-prem / air-gapped	●	○	○	○	◐	○
Local / sovereign / BYO model	●	○	○	○	◐	◐
Per-action AI approval & revert	●	◐	◐	◐	◐	○
Self-managed deployment	●	◐	○	○	◐	●
In-country data residency	●	◐	◐	◐	◐	◐
Arabic RTL UI & Hijri SLAs	●	○	○	◐	◐	○
Source-code / white-label	●	○	○	○	○	○

● Native / fully available ◐ Partial, add-on, separate product or tier-gated ○ Not available or ending

Competitor ratings reflect vendors' public materials as of October 2026 and may vary by plan, edition or region. Jira, Asana, monday.com, ServiceNow and Azure DevOps are trademarks of their respective owners, referenced for comparison only.

Why Teams Switch from Jira

Self-managed beyond 2029
Jira Data Center reaches end of life in March 2029. Keep on-prem and air-gapped options long-term.

One licence, not five
Agile, portfolio, ITSM, assets and timesheets in one edition — no add-on stacking.

AI you control
Local or sovereign models, approval rules per agent, and one-click revert of any AI change.

Switch without disruption
Jira-compatible API, JQL-to-MQL, one-click importer and two-way sync for a phased cutover.

13 Built-in AI Agents Intake · Breakdown · Readiness · Triage · Assignment · Estimation · Status · Risk Sentinel · Service · Code · Test · Insights · Incident Commander

Deploy Anywhere SaaS · Dedicated · Sovereign cloud · On-premises · Air-gapped · White-label

Become a design partner — build once, deploy anywhere, govern every AI action.
